

Task 2: Phishing email analysis

Look at the example below:

Here we have na fraudulent PayPal's email, sent by an malicious actor, the main points that we have here are highlited on the Picture and I'll explain all of it and the reason that it's a phishing email:

Dear PayPal customer: normally, the companies knows your customer's names, and put it in the message.

24 hours to solve the problem or your account will be permanetly disabled:

Here we have an error at permanetly, common wrong in phishing messages, and this paragraph appeals to the fear, that's intentioned to make anyone be scared and susceptible to click on the link.

We belive/Unauthorized users: in danger from unauthorized users", but provides no specific details. Real companies are more precise when reporting issues.

Clicking the link below and following the steps: The email includes a call to action "Confirm Your Information" which likely leads to a fake website designed to steal your credentials or personal data
